

COLORSOL STABILISING SOLUTION

GODAVRI
PAINTS

Total Paint Solutions

COLORSOL is a polymer based primer normally applied to stabilize friable or chalky surfaces before applying decorative exterior paint. **COLORSOL** has such penetrative and water repellent properties that nothing else is to be done to prepare the surface for applying decorative exterior paint.

SURFACE PREPARATION :

Before applying **COLORSOL** the surface should be thoroughly scrapped with a wire or coir brush and cleaned removing all loose particles.

APPLICATION :

COLORSOL is applied in a ready to use condition and is not necessary to dilute it or mix it with exterior paint or any other solution. It should be liberally applied by brush on dry, frostless surfaces.

WHERE TO APPLY :

COLORSOL is applied on cement / lime / sand renderings, concrete block work, rough cast/pebble dash, brick work, asbestos sheets, cement paint, emulsions, etc. About 12 hours after **COLORSOL** is applied, decorative exterior paint can be applied.

COVERAGE :

60-75 sq.ft. single coat per litre. Coverage will depend on the nature of the surface. It will be less on rough or texture surfaces.

NOTE : After applying **COLORSOL** the brush should be cleaned properly.

PACKING : **COLORSOL** is available in 20 Ltrs. and 5 Ltrs. containers.
