

INSPIRA DURAPLAST

What is Inspira Duraplast ?

An innovation in textured exterior wall paint that gives a durable decorative stone finish of uneven patterns and non-symmetrical designs, beautifying & protecting buildings for years.

INSPIRA Duraplast is a combination of the strong and adhesive features of synthetic plaster and the decorative quality of paint. It brings the natural textures to the walls giving them an aesthetic look.

What is it made of?

Specially formulated out of Acrylic Polymers, Marble chips, Quartz powder, Siliceous aggregates.

What are its salient features?

INSPIRA Duraplast resists severe climatic variations and pollution and retains the original texture of the surface for years. Special chemicals and additives used in its formulation make it resistant to fungus and algae. It is absolutely waterproof. It does not peel off. It is washable. And it is available in a wide range of Longlasting colours.

The Application process :

INSPIRA Duraplast should be applied on absolutely dry surface. Care should be taken to ensure that no water or moisture finds its way behind the **INSPIRA Duraplast** coating. On newly plastered surface it can be applied direct without any dilution by steel / plastic trowel in desired textures. Unlike other similar factory made coatings, **INSPIRA Duraplast** provides enough flexibility to the user as its colours and designs of the panels are specially made for each site. A single coat in 1.2 to 2 mm thickness is recommended on smooth surfaces, and multiple coats of up to 3 mm thickness if the surface is rough and uneven, with sand or other particles sticking out. Old flaky / chalky surfaces should be so scraped to remove all the old plaster, and a sealing primer applied before **INSPIRA Duraplast** application, it has to be finished with 2 top coats of desired shades.

INSPIRA Duraplast dries completely after 24 hours in normal climatic conditions.

Consumption : Varies depending on the surface.

Pack Size : 25 kgs
