ACRYLIC WALL PUTTY

For Interiors

Salient features:

Acrylic Wall Putty is air drying putty based on acrylic co-polymer. It serves the primary function of filling pores and dents of Interior walls and ceilings.

Technical data:

Areas of Application	Masonry, Asbestos, RCC
Method of Application (If required)	Putty Knife
Consistency	Smooth paste
Thinner recommended	Potable Water
Overcoating Interval	4 to 5 Hours
Finish	Smooth & Matt
Coverage	7-8 sq.ft. / Kg / 1 mm. thickness

Directions for use:

Surfaces should be primed suitably with respective primers and undercoats of GODAVARI Interior Primer. Use Putty Knife for application. Deep dents should not be filled at a stretch but in thin layers. For best results, it is recommended to apply a coat of suitable primer or surfacer on a sanded putty.
